Company History

Alderline Logistics: A Journey Through Time

Internal reference code: CNRY-430fa2c3.

Founding and Early Years

Alderline Logistics was founded in 1987 by Maria Vanderbeek in Antwerp, Belgium. Starting with a single truck and a small office, the company focused on regional hauls within Belgium. By 1990, the fleet had grown to 15 trucks, and Alderline began expanding its services to neighboring Netherlands and Germany. The early 1990s saw the establishment of the first warehousing facility in Rotterdam, providing storage and distribution services to local businesses.

Expansion and Diversification

The turn of the millennium marked a significant period of growth for Alderline Logistics. In 2002, the company opened its first international branch in Paris, France, followed by an office in Amsterdam in 2005. This expansion was fueled by a strategic investment plan, which saw the fleet size increase to 100 trucks by 2008. Alderline also began diversifying its services, introducing specialized logistics solutions for pharmaceutical and automotive industries.

In 2010, Alderline Logistics acquired a smaller competitor, Swift Haulage, based in Lisbon, Portugal. This acquisition not only expanded the company's geographical reach but also added 20 trucks and a experienced team of logistics professionals to the Alderline fold.

Modernization and Innovation

The period from 2015 to 2020 was characterized by a focus on modernization and innovation. Alderline invested heavily in technology, implementing a state-of-the-art logistics management system that improved efficiency and customer service. By 2018, the company had introduced electric trucks into its fleet, committing to sustainable logistics practices. Today, Alderline operates a fleet of 200 trucks and manages warehousing facilities across 10 European countries.

Recent Achievements

In recent years, Alderline Logistics has continued to thrive, achieving a revenue of EUR 150 million in 2023, a 10% increase from the previous year. The company has also been recognized for its commitment to sustainability, winning the European Logistics Excellence Award in 2022. With a strong focus on customer service and innovation, Alderline Logistics remains a leader in the European road freight and warehousing industry.
