Performance Review Process

Performance Review Cycle

Internal reference code: CNRY-dea813e9.

At Alderline Logistics, our Performance Review Process is conducted annually, with each employee's review scheduled between January 15th and March 15th. This cycle ensures that all team members have the opportunity to reflect on their accomplishments, address any challenges, and set goals for the upcoming year. Each review is completed by the direct supervisor and involves a 90-minute one-on-one meeting.

Key Performance Indicators (KPIs)

For our road freight department, KPIs include on-time delivery rate, fuel efficiency, and client satisfaction scores. Warehouse teams focus on inventory accuracy, order fulfillment speed, and safety incidents. For Q3 2023, the road freight team achieved an average on-time delivery rate of 94%, a 2% increase from Q3 2022. Warehouse teams maintained an inventory accuracy rate of 98.5%, surpassing the target of 98%.

Review Structure and Documentation

Each performance review will follow a structured format, documented using our HR software, TalentTrack. The review includes:

1. **Achievements and Contributions**: Highlight specific accomplishments and contributions made during the review period.
2. **Areas for Improvement**: Identify areas where performance can be enhanced.
3. **Goals for Next Year**: Set clear, measurable goals for the upcoming year.
4. **Feedback and Development Opportunities**: Discuss any training or development opportunities that could benefit the employee.

All reviews must be completed and entered into TalentTrack by March 15th. Supervisors will meet with their HR Business Partner to ensure compliance and accuracy.

Recognition and Development

Employees who exceed their KPIs and demonstrate exceptional performance will be recognized in the quarterly company newsletter and may be eligible for performance bonuses. Additionally, Alderline Logistics invests in continuous development; employees with high potential may be offered tailored training programs or mentorship opportunities. In 2023, we allocated EUR 250,000 for employee development initiatives, ensuring that every team member has access to resources that foster growth and excellence.
