Sanctions Screening Procedure

Sanctions Screening Procedure

Internal reference code: CNRY-f2475718.

Effective Date: January 15, 2025

Prepared by: Legal Department, Alderline Logistics

Purpose

This document outlines the procedures for ensuring compliance with international sanctions regulations. It aims to prevent any business activities with sanctioned individuals, entities, and countries as defined by the European Union, United Nations, and other relevant bodies.

Scope

This procedure applies to all employees, contractors, and third-party service providers involved in any aspect of Alderline Logistics' operations, including road freight services and warehousing activities.

Screening Process

Initial Screening

All new customers, partners, and suppliers must undergo an initial sanctions screening before any contractual agreement is finalized. This screening will utilize the **Global Sanctions Database (GSD)**, updated weekly, to check against the following lists:

1. EU Consolidated Sanctions List
2. UN Security Council Sanctions List
3. OFAC Specially Designated Nationals (SDN) List
4. UK HM Treasury Sanctions List

The screening process will be conducted by the **Compliance Team** and must be completed within **5 business days** of receiving the necessary documentation.

Ongoing Monitoring

Alderline Logistics will implement ongoing monitoring for all active customers, partners, and suppliers. This will be conducted quarterly using the GSD and will include additional checks for any changes in ownership or management structures. Any identified matches will be escalated to the **Legal Department** for further review.

Reporting and Escalation

Any potential or confirmed match identified during the screening process must be reported immediately to the **Legal Department**. The Legal Department will assess the risk and determine the appropriate course of action, which may include:

- Termination of business relationship
- Notification to relevant regulatory authorities
- Implementation of additional compliance measures

All reports must be submitted using the **Sanctions Incident Report Form** and will be reviewed within **2 business

days** of submission.

Training and Awareness

All employees will receive annual sanctions awareness training, with additional training sessions provided for staff in high-risk areas such as customer onboarding and compliance. Training records will be maintained by the **Human Resources Department**.
