Year End Close Checklist

Year End Close Checklist

Internal reference code: CNRY-9583daef.

Financial Reporting

All financial reports for the year ending December 31, 2024, must be submitted by January 10, 2025. This includes the following:

- **Income Statement**: Finalized by January 7, 2025. Last year's submission was January 8, so we aim to improve our timeline.
- **Balance Sheet**: Completed by January 8, 2025. Ensure all accounts are reconciled, especially Accounts Receivable (target: EUR 2.5M) and Accounts Payable (target: EUR 1.8M).
- **Cash Flow Statement**: Due by January 9, 2025. Confirm cash balances with the bank; the target closing balance is EUR 3.0M.

Account Reconciliation

All accounts must be reconciled by January 15, 2025. Key accounts include:

- **Inventory**: Reconcile physical counts with system records. Last year, we had a variance of EUR 45,000; this year's target variance is below EUR 20,000.
- **Fixed Assets**: Update depreciation schedules and ensure all assets are properly capitalized. The accumulated depreciation as of December 31, 2024, should be EUR 12.7M.
- **Payroll**: Confirm all wages, bonuses, and deductions. The total payroll expense for 2024 is expected to be EUR 8.2M.

Audit Preparation

Prepare for the external audit scheduled to begin on February 1, 2025. Ensure the following:

- **Audit Trail**: All transactions have a clear audit trail. Last year, we had three major findings; this year, the goal is zero findings.
- **Documentation**: Organize all supporting documents, including invoices, contracts, and bank statements. Use the document management system to store and tag files properly.
- **Audit Meeting**: Schedule a meeting with the audit team by January 20, 2025, to discuss any potential issues and review the audit plan.

Year-End Adjustments

Complete all necessary year-end adjustments by January 12, 2025. This includes:

- **Accruals**: Record all accrued expenses and revenues. The total accruals for 2024 are estimated at EUR 350,000.
- **Deferrals**: Adjust for any deferred revenues or expenses. The deferred revenue for 2024 is EUR 150,000.
- **Inventory Valuation**: Apply the correct valuation method (FIFO/LIFO/Weighted Average) and ensure all adjustments are documented. The ending inventory value should be EUR 6.4M.
