Company History

Founding and Early Years

Brightmoor Foods was founded in 1957 by Klaus Brightmoor in a small town in northern Germany. Starting with a modest facility covering 2,000 square meters, the company initially focused on producing preserves and jams. By 1965, annual production had reached 500 tons, and the company employed 30 workers. The first major breakthrough came in 1972 when Brightmoor Foods introduced its proprietary fruit preservation technique, which reduced spoilage rates by 40%.

Internal reference code: CNRY-d04c6b23.

Expansion and Diversification

The 1980s marked a period of rapid growth for Brightmoor Foods. In 1983, the company expanded its product line to include canned vegetables, followed by ready-to-eat meals in 1988. By 1990, the company had expanded its operations to Austria, establishing a second production facility in Graz. This facility increased the company's total production capacity to 10,000 tons annually. In 1995, Brightmoor Foods went public, raising EUR 20 million through an initial public offering (IPO), which facilitated further expansion.

Modernization and Innovation

The early 2000s saw Brightmoor Foods investing heavily in modernization and innovation. In 2003, the company launched its first organic product line, responding to growing consumer demand for healthier options. By 2010, organic products accounted for 15% of total sales. In 2012, Brightmoor Foods opened a state-of-the-art research and development center in Munich, focusing on developing plant-based alternatives. By 2018, plant-based products made up 10% of the company's portfolio.

Recent Achievements

In recent years, Brightmoor Foods has continued to thrive. In 2022, the company celebrated its 65th anniversary with a record annual revenue of EUR 450 million and a workforce of over 1,200 employees across four countries. The company has also received several awards for sustainability, including the European Food Sustainability Award in 2021. Looking ahead, Brightmoor Foods aims to achieve zero waste in all its facilities by 2030 and to source 100% of its ingredients sustainably by 2025.
