# IT Help Desk Guide

**IT Help Desk Guide**

Internal reference code: CNRY-a931dcb3.

## Introduction

Welcome to the IT Help Desk at Brightmoor Foods. This guide provides essential information and procedures to help you navigate common technical issues efficiently. Our goal is to minimize downtime and ensure all employees can access the systems they need to perform their jobs effectively.

## Common Issues and Solutions

### Password Resets
If you are unable to log into your account, the first step is to reset your password. You can do this by visiting the **Password Reset Portal** on the company intranet. You will need your employee ID, which is located on your ID card. After verifying your identity, you will be able to set a new password. If you have any issues with this process, contact the Help Desk at **ext. 4500** or submit a ticket via the **Help Desk Portal**.

### Network Connectivity Problems
If you are experiencing network connectivity issues, start by checking the physical connections. Ensure your Ethernet cable is securely plugged in, and your computer is connected to the correct power source. If wireless connectivity is the issue, ensure you are connected to the **Brightmoor_WiFi** network and have entered the correct security key, which is sent annually in the welcome email (most recently sent on **January 15, 2024**). If problems persist, restart your router and modem, located in the IT closet on the 2nd floor. If the issue continues, log a ticket with the Help Desk.

## Contact Information

For immediate assistance, you can reach the IT Help Desk during business hours, **9:00 AM to 5:00 PM, Monday to Friday**. The phone number is **ext. 4500**. For after-hours support, dial **+31 20 1234 5678** and leave a detailed message. All tickets are tracked using the **Help Desk Portal**, accessible via the company intranet. Please ensure you provide your **employee ID**, a detailed description of the issue, and any error messages you receive.

## Escalation Process

If your issue is not resolved at the first level, it will be escalated to Level 2 support. This may involve **senior IT staff** or **specialist vendors**. You will receive an email notification when your ticket is escalated, with an estimated resolution time. For critical issues affecting more than **three employees** or business-critical systems, we aim to resolve these within **2 hours**. For non-critical issues, the target resolution time is **24 hours**.
